Let's Start!

It's not always fair.

Learning Outcome

Express duty, advice, willingness, or intention to do something in spoken or written texts and in work and social contexts.

Can Do Statements

- I can talk about social issues, beliefs, opinions and moral or personal dilemmas.
- I can express obligations and recommendations.
- I can make a polite request using *will* or *would*.

Ask your partner:

- Why do you think some people have a lot of money while others have very little?
- Do you think the government should be responsible for making sure that wealth is more equally distributed? Why or why not?

Let's Explore!

The rich get richer while the poor get poorer.*

* This saying expresses the belief that society is set up to favor the economic gain of people who already have money.

Instructions: Read the text aloud.

You know the expression: "The rich get richer while the poor get poorer". The uneven distribution of income and wealth, called income inequality or economic inequality, should be seen as one of the critical challenges of our time.

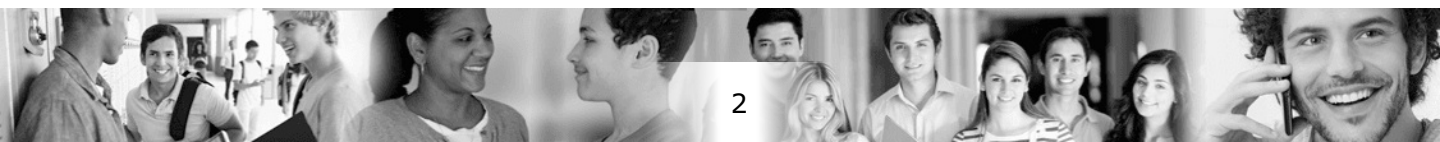

Economic inequality is the result of many factors. Some people argue that taxation policies often favor people with a greater income. These people believe that governments ought to have a role in redistributing wealth among the citizens within its society. They say, "It's just not fair! If you make rich people pay higher taxes, income distribution will be much fairer." Other people point to factors such as greater returns on investment that wealthy people usually enjoy. They think everyone ought to benefit from free market forces.

A new study published by researchers at the University of California, Berkeley, uses science to make a connection between the issues of economic inequality and climate change. The study came on the heels of a previous study published one month earlier that said changes ought to be made to environmental policies. In essence, the study said to world leaders: Will you seriously consider decreasing carbon emissions so there will be beneficial consequences to the world economy?

The study found that climate change will increase global inequality. Global warming is beneficial for colder countries such as those in Europe, which tend to be richer and more advanced, but more harmful for poorer countries with warmer temperatures, such as those in Africa and South Asia.

The researchers argue that economic leaders around the world should understand the consequences of global warming. Once leaders realize the impact of climate change, they ought to act in a concerted way to reduce the risks of increased inequality.

Your opinion should be heard! Would you be so kind as to complete our online survey? Would you send us a message with your point of view? We will feature your ideas in our next article.

Let's Practice!

Let's redistribute the wealth!

Instructions: Read the sentences. Select all the correct answers.

Which sentences express obligation or recommendation?

- ☐ 1. The uneven distribution of income and wealth, called income inequality or economic inequality, should be seen as one of the critical challenges of our time.
- ☐ 2. The study found that climate change will increase global inequality.
- ☐ 3. These people believe that governments ought to have a role in redistributing wealth among citizens within its society.
- ☐ 4. Once leaders realize the impact of climate change, they ought to act in a concerted way to reduce the risks of increased inequality.
- ☐ 5. In essence, the study said to world leaders: Will you seriously consider decreasing carbon emissions, so there will be beneficial consequences to the world economy?

Let's Practice!

We have plenty of money to support everyone!

Instructions: Proofread the sentence. Circle the incorrect word. Write the correct word above the incorrect one to complete the sentence.

1. You know the expression: "The rich get richer while the poor get poorer". The uneven distributed is one of the critical challenges of our time.
2. Economic inequality is the result of many factors. Some people argue that taxate policies policies often favor people with a greater incoming.
3. Other people point to factors such as greater turns on invest that wealthy people usually enjoy.
4. On essences , the study said to world leaders: Will you seriously consider decreasing charbon emissary , so there will be beneficial consequences to the world economy?
5. Globalize warm up is beneficial for colder countries such as Europe.

Extension Activity

Write a letter to a political leader giving your opinion on the distribution of income.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- With a partner, discuss the issue of income distribution in your country and around the world.
- Think of a political leader you would like to write a letter to. It could be a leader in your country, a different country or a leader at the United Nations.
- Review the opinions about the distribution of income expressed in this lesson.
- Write a letter of 120 - 150 words. In your letter, describe some issues or problems you see and some possible solutions.
- Use the structure of a letter (your address, date, opening salutation, final closing).
- Review your letter for correct spelling and punctuation.
- Read your letter to your partner.

Self-Assessment

Yes No

I discuss the issue of income distribution.

☐ ☐

I write a letter using the correct structure.

☐ ☐

I give my opinion on income distribution.

☐ ☐

I suggest solutions.

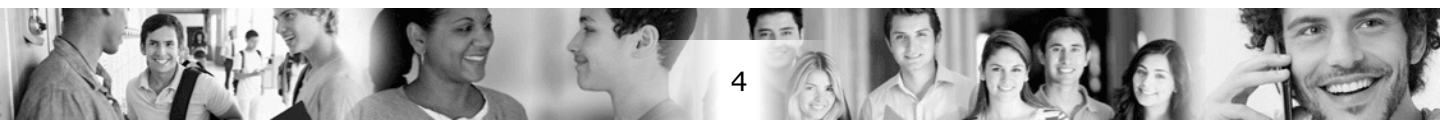

☐ ☐

I read my letter aloud.

☐ ☐

Target Words

- income** (noun): the amount of money you earn
e.g. Some people argue that taxation policies often favor people with a greater income.
- distribution** (noun): the division of some good, like food or income, between different people
e.g. The uneven distribution of income and wealth should be seen as one of the critical challenges of our time.
- taxation** (noun): paying taxes
e.g. The taxation policies in this country need to change.
- carbon emissions** (noun): gases released into the air from some human activities, such as burning fossil fuels
e.g. Will you seriously consider decreasing carbon emissions so there will be beneficial consequences to the world economy?
- in essence** (expression): in general; in summary
e.g. In essence, the study asked world leaders to reduce pollution.
- return on investment** (expression): the money you receive after having invested (put money) into a project or a company
e.g. Other people point to factors such as greater returns on investment that wealthy people usually enjoy.
- global warming** (expression): increased average temperatures in the world (aspect of climate change)
e.g. Global warming is beneficial for colder countries such as those in Europe, which tend to be richer and more advanced.

Learning Points

Should / Ought to / Had Better for Obligation and Recommendation

You use **should**, **ought to** and **had better** to give advice.

There are some points to keep in mind about using these modal verbs.

1. You use either **ought to** or **should** to provide advice.

For example:

*The policy says that the company **should** reimburse employees for holiday hours.*

*You **ought to** see a doctor as soon as you can.*

1. Although **should**, **ought to** and **had better** have the same meaning, **ought to** implies a negative consequence if you don't follow the advice.

For example:

*We **had better** call the police right away!*

1. **Ought to** and **had better** are not used in questions.

1. In negative sentences, the word **not** goes after **should**, **had better** and **ought** (ought not).

For example:

*You **should not** (shouldn't) smoke inside your apartment.* (Shouldn't is the contraction of should not.) *You **had better not** smoke inside the apartment.* (There is no contraction when using had better.)

*You **ought not smoke inside the apartment.*** (There is no contraction when using ought to and 'to' is dropped.)

Examples:

- *The uneven distribution of income and wealth, called income inequality or economic inequality, should be seen as one of the critical challenges of our time.*
- *These people believe that governments ought to have a role in redistributing wealth among citizens within its society.*
- *They think everyone ought to benefit from free market forces.*
- *The study came on the heels of a previous study published one month earlier that said changes ought to be made to environmental policies.*
- *The researchers argue that economic leaders around the world should understand the consequences of global warming.*
- *Once leaders realize the impact of climate change, they ought to act in a concerted way to reduce the risks of increased inequality.*

Learning Points

Will and Would to Ask Politely or to Insist

You can use **will** and **would** to ask for things politely. You can also use *will* when you want to insist on doing something.

For example:

Will you come with me, please?

Will you sign on the dotted line, please?

Would you please tell her that her doctor called?

Would you do me a favor, please?

Depending on the context, a request can also function as a command.

When you want to insist on doing something, even if it is not recommended or inadvisable, you can use *will*.

For example:

If you **will** refuse to see the dentist, it's not surprising your tooth is getting worse.

In this case, when you say a sentence like this, you need to put strong stress on the word *will*.

Examples:

- If you make rich people pay higher taxes, income distribution will be much fairer.
- Will you seriously consider decreasing carbon emissions so there will be beneficial consequences to the world economy?
- Would you be so kind as to complete our online survey?
- Would you send us a message with your point of view?
